Phone/Fax Number:

Michael Garcia
Point of Contact:

COST: \$38,990.92

The WWRF uses reclaimed wastewater almost exclusively for process water, irrigation, and
miscellaneous washdown duties. Reclaimed wastewater contains small particles of debris that can
foul various parts of equipment. These filters will take that out of the reclaimed water stream and
reduce staff manhours related to troubleshooting and repair of equipment fouling due to debris.
These filters are preferred due to their simplicity and minimum use of externally mounted
equipment subject to leaking and malfunction. Evoqua is the only manufacturer of filters
meeting these requirements and PureOps is the sole source vendor of the Evoqua line of
Filtration Systems in New Mexico.
